

## 60-Second Conversation Transcription

**Speaker 1 (Student):** I'm feeling really confused about my career. I don't know what to do next. I've applied for many jobs, but no one is responding. It's stressing me a lot.

**Speaker 2 (Friend):** Why are you so stressed? What ideas are you thinking about right now to move your career forward?

**Speaker 1:** Well! I have three options. First, I can take a course and study Data Science. Second, I can do a PG in MBA, maybe in Business Analytics or HR. But if I do MBA, I feel my technical engineering skills will reduce. Third, I could do PG and also study Data Science side by side and try to do both.

**Speaker 2:** If you do both, it will be hard. PG means exams, assignments, semesters, projects, internships... you won't be able to focus properly on the course. I think you should just enroll in a course.

**Speaker 1:** Yeah, that's what I was thinking. I was planning to find jobs online too, but still no response.

**Speaker 2:** That's why you should focus on the course first. Why make things complicated? If it's a six-month course, it will be short. Doing PG together will divide your focus and it ends up studying nothing and leaving all in half-way.

**Speaker 1:** Okay... I understand. I will search for some courses, let you know, and then decide.

### Notes for Submission:

#### 1. Likely misrecognized words:

- Data Science
- MBA
- Business Analytics
- PG
- Tamil phrases that gets complicate to understand

#### 2. Emotionally important moments:

- I'm feeling really confused
- It's stressing me a lot
- Laugh / smile near the end
- Shift from stressed → thinking → calm

#### 3. Code-switching / Mixed language:

- Course
- MBA
- Job
